

Contents

Chapter 1	Higher cognitive function processing in developmental age: specialized areas, connections and distributed networks <i>Daria Riva</i>	1
Frontal lobes		
Chapter 2	Frontal lobes: anatomy, connections and functions <i>Alessandra Erbetta</i>	11
Chapter 3	Role of the parieto-frontal mirror system <i>Leonardo Fogassi</i>	19
Chapter 4	Memory and frontal lobe in typical and atypical development <i>Stefano Vicari, Floriana Costanzo, Pamela Varvara and Deny Menghini</i>	31
Chapter 5	Development of executive function <i>Giovanni Valeri</i>	41
Chapter 6	Neuropsychology of epilepsies involving the frontal lobe in children <i>Chiara Vago, Sara Bulgheroni and Daria Riva</i>	53
Chapter 7	Social problem solving after traumatic brain injury in children <i>Gerri Hanten, Elisabeth A. Wilde and Harvey S. Levin</i>	63
Chapter 8	The role of phonological working memory in specific language impairment <i>Daniela Brizzolara, Claudia Casalini, Anna Chilosi and Chiara Pecini</i>	73

Limbic system

Chapter 9	Neuroanatomic organization and fundamental functions of the hippocampus and amygdala <i>Pierre Lavenex</i>	89
Chapter 10	Early hippocampal disease and memory disorders <i>Daria Riva, Arianna Usilla, Chiara Vago and Sara Bulgheroni</i>	119
Chapter 11	Language disorders in children with morphologic abnormalities of the hippocampus <i>Josette Mancini, Guillaume Agostini, Nathalie Villeneuve, Mathieu Milh, Florence George, Brigitte Chabrol and Nadine Girard</i>	129
Chapter 12	Hippocampus, neurotrophic factors, and depression: possible targets for antidepressant medication <i>Gabriele Masi, Paola Brovedani and Angela Magazù</i>	141
Chapter 13	The role of the hippocampus in neural mechanisms of attachment and attachment disorders: a review <i>Charles Njikiktjien and Catharina Anna Verschoor</i>	157
Chapter 14	Music, emotions and the limbic system <i>Maria Cristina Saccuman, Guido Andreolli and Danilo Spada</i>	175
Chapter 15	The amygdala and the pathophysiology of autism <i>Baris Korkmaz</i>	189
Chapter 16	Long-term neurobiologic impact of extreme early institutional deprivation in the English and Romanian Adoptees study: initial findings and future plans <i>Edmund J.S. Sonuga-Barke, Robert Kumsta and Mitul A. Mehta</i>	209

Visuocognitive system

Chapter 17	Visual field defects and visual search abilities in children with focal brain lesions <i>Giovanni Cioni and Francesca Tinelli</i>	225
Chapter 18	Neurophysiologic and behavioural aspects of visual assessment: correlation with neuroimaging <i>Oliver Braddick and Janette Atkinson</i>	231
Chapter 19	Linked brain development for vision, visual attention and visual cognition in typical development and in developmental disorders <i>Janette Atkinson and Oliver Braddick</i>	247
Chapter 20	Visuocognitive and visual disorders in children born preterm <i>Sara Bulgheroni, Chiara Treccani, Daria Riva, Giovanni Cioni and Francesca Tinelli</i>	271
